

simple • smart • strong

 **McDOWELL-CRAIG**™  
OFFICE FURNITURE

*...because you've got work to do*™

is the exciting frame and tile system that employs *smart simplicity* to get right to the heart of what you want from a panel system. Beneath the distinguished good looks, Simon houses substantive features that will surprise you.

**Simon is simple** . . . a single bolt connects the frames, connectors and door units reducing installation times significantly.

**Simon is smart** . . . providing unequalled data, voice and power capacity without the need of raceways. Termination points are not limited to raceways, but are optimized to fit your project.

Acoustical tile options enable this completely flexible system to maintain the kind of peace and quiet you need to get things done.

**Simon is strong** . . . with *domestic* steel construction of frames, tiles and connectors, Simon provides unmatched structural integrity and rigidity. Integrated steel filing and storage provide a foundation of strength and functionality.

Yes, finally there is a frame and tile system with nothing to hide, its name is Simon.
